English

Marathi

## ABOUT ME

Myself Sakshi Jadhav, currently pursuing BTech in Computer Engineering (Third Year) and seeking for an intern so as to get experience and to cope up knowledge with the industrial field in order to chase the further goal. I had done Programming Languages of C , C++ and Java courses along with its certification and also had the industrial training with HTML , CSS , JavaScript and Bootstrap. Recently, I had also studied Python Language along with building project on it. I am also used to Android Studio Software and had built the Healthcare Application using Android Studio. As an extra curricular activity I also have the knowledge of building basic Test Cases on any specific Application. Recently, I worked on an IoT based project of Home Automation System from Remote Place using Arduino Programming Language as software and hardware. Speaking of Ubuntu, I do know some basics of Linux commands which have been taught during Diploma Education. I hope that I would satisfy your technical needs and if not to fit I will try to grasp those in order to make my work a better place.
